How to: Search within a journal in WISE

Start at Westminster.edu/library

Instead of typing in your search terms, click the magnifying glass icon to open up Advanced Search.

Put your keyword(s) in the first search bar, in the second, change the dropdown “Search Index” to “Journal Source; Source”. Then type out the name of the journal you wish to search in quotation marks like this, “Language Arts”. You can leave the bottom bar empty and then click “Search”
How to: Search within a journal in WISE

Now your search results will only be articles from your specified journal that include your keyword(s). If needed, you can use the side bar to further limit your search by date.
